Subject: **B. Tech. (Engineering Physics) proposal w.e.f. 2024-25**
(Ref.: Reso. 14 of 61st IAAC dtd. 28.02.2023)

Dear Sir,

The B.Tech. (Engg. Phys.) proposal w.e.f. 2023-24 was forwarded for consideration in 61st IAAC dtd. 28.02.2023 which was deferred to start from 2024-25 with following resolution:

"*Reso.14: The head of the department is advised to explore the placement scenarios of the currently running five years integrated M.Sc. in Physics program which will help in starting new program B.Tech. in Engineering Physics. It is resolved to consider the item for starting the program from the academic year 2024-25.*"

Accordingly, the placement scenario of ongoing Integrated M.Sc. (Physics) is explored and the entire B.Tech. (Engineering Physics) curriculum is thoroughly revised as per NEP 2020, in the line of currently ongoing same degree course in reputed institutions like IIT Bombay and IIT Delhi, ongoing new NEP based curriculum w.e.f. 2023-24 in Int. M.Sc. (Physics) and other B.Tech. curriculum of SVNIT.

As mandated in Reso. 14 above, the logic of initiating the Integrated MSc (as against classical two years post graduate course), are to train and create a pool of scientifically oriented intellectual manpower as it was realized that they are the ultimate torchbearers of next and more advanced phase of the development of the country.
Hence the courses are so designed that the students pursue their abilities and skills and interests in furthering the sciences. This is achieved by training them to be accepted for more advanced higher studies in the country as well as in abroad. The department is happy to address that with the continuous support, guidance and encouragement by the institute authority, the Integrated M.Sc. (Physics) is nicely placed as following representative statistics for last three academic years:

AY	Discipline	Program	Campus Placement*			Higher Educ. (Ph.D.)	Total students (Pass out)	Overall placed (%)
			Participated	Placed	% Placed			
2020-21	Physics	Int. M.Sc.	15	7	**46.66**	5	20	**60.00**
2021-22	Physics	Int. M.Sc.	34	12	**35.29**	7	42	**45.24**
2022-23	Physics	Int. M.Sc.	37	21	**56.75**	11	51	**62.74**

*Salary Range: 3.5 to 10 LPA Ref.: https://www.svnit.ac.in/web/t&p/about.php

As, just for the sake of clarity and comparison, the classic placement scenario in the above table is nicely aligned with that of the existing M. Tech. courses.
However, the undergraduate B.Tech. (Engineering Physics) is aimed to cater to the need of the industry oriented towards the utilization of the understanding of the core physics for their advanced level of applications, and research. To support this, we present the popularity of the B. Tech. (Engg. Phys.) course successfully running in the institutes across as follows:

Placement Records (Engg. Phys.):

IIT Bombay:

AY	Discipline	Program	Participated	Placed	% Placed	Avg. Salary
2020-21	Engineering Physics	B.Tech.	21	19	**90.48**	**22 LPA**
		Dual Degree (B.Tech.+M.Tech.)	6	6	100	
2021-22	Engineering Physics	B.Tech.	22	21	**95.45**	
		Dual Degree (B.Tech.+M.Tech.)	4	4	100	
2022-23	Engineering Physics	B.Tech.	25	21	**84**	
		Dual Degree (B.Tech.+M.Tech.)	5	4	80

In light of the above, Department of Physics is confident that with the support of all the members of the institute, we will be able to create an excellent pull of undergraduates who can be directly employed in the industry.
