COMPUTER ENGINEERING DEPARTMENT

1. Multidimensional Data Models

2. Different Evaluation methods for Classification/Clustering algorithms

3. Data Abstraction, Encapsulation, Inheritance and Polymorphism in Object Oriented Languages

4. Rendering Methods/Image Synthesis

5. Privacy compliance in big data / distributed / cloud systems

6. Session management in Web Application

7. Mother Board- The Central Printed Circuit Board (PCB)

8. Booting in Linux/Windows OS

9. Best, Worst and Average Case of Sorting Algorithms

10. Memory Management in Recursive process and Iterative Process
